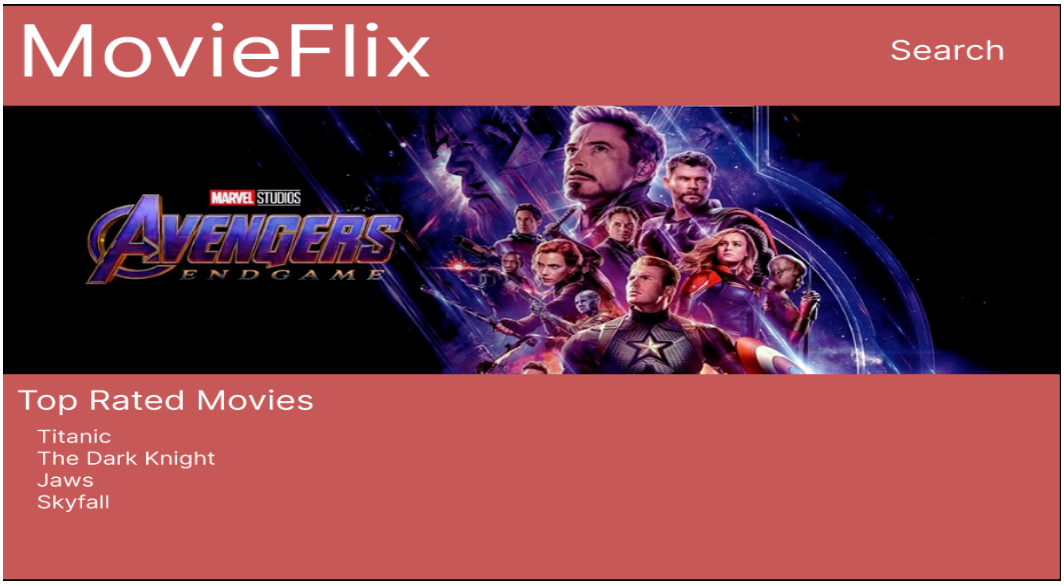
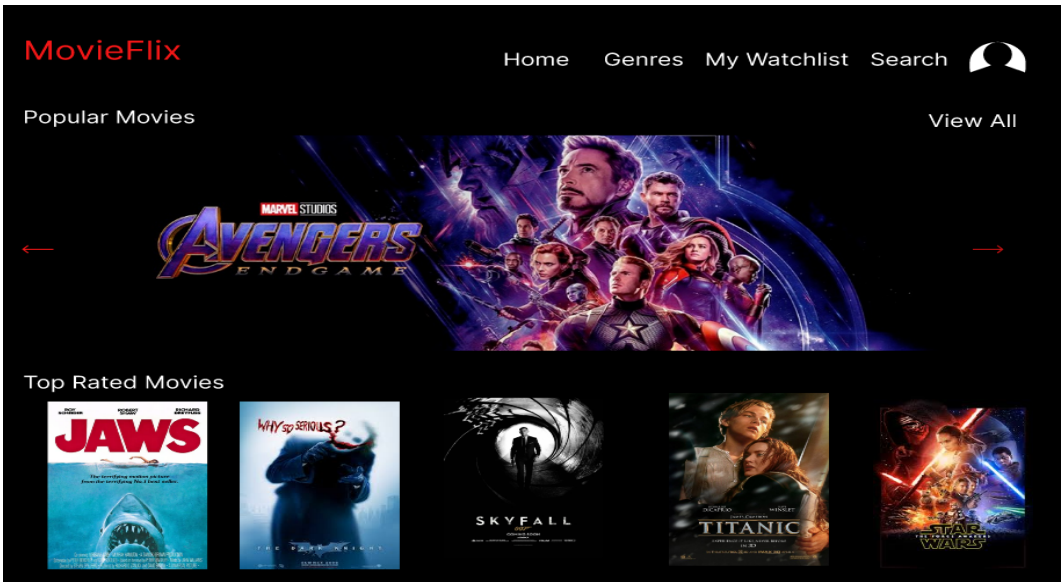
USER INTERFACE AND DESIGN

COMPARISON OF UI DESIGN BETWEEN TWO FIGMA CREATION

Bad Website:



Good Website:



PROTOTYPE LINK: https://www.figma.com/design/qFyOmXLyVXhR8ZdBBl4jkW/UI-DESIGN?node-id=0-1&t;=s6jviRYraMCK3fY2-1

The two movie websites have distinct designs and approaches. Here's a comparison:

BAD WEBSITE
Design Style:
• Very basic and outdated movie interface design.
• Plain background with limited use of colors and visuals.
• Mostly text-based layout with large blocks and rectangular sections.
• No proper visual hierarchy; content feels crowded.

Content:
• Displays movie names as plain text without posters.
• Top-rated movies shown as simple lists.
• No ratings, genres, or thumbnails.
• Content lacks engagement and visual appeal.

Navigation:
• Minimal and non-interactive navigation.
• Sections are not clearly separated.
• No icons or visual indicators for guidance.

Purpose:
> Focuses only on listing movie titles.
> Does not encourage exploration.
> Poor movie browsing experience.

GOOD WEBSITE
1. Design Style
> Modern and visually rich movie interface.
> Uses dark theme with colorful posters and banners.
> Clear visual hierarchy with spacing and alignment.
> Professional entertainment platform design.

2. Content
> Movies displayed using high-quality posters.
> Popular and top-rated sections use cards.
> Visually engaging thumbnails.
> Well-organized and attractive content.

3. Navigation
> Clear top navigation bar with Home, Genres, Watchlist, and Search.
> Arrow controls for scrolling movie lists.
> Icons improve usability and clarity.

4. Purpose
> Complete movie browsing experience.
> Focuses on usability and aesthetics.
> Encourages user interaction.

KEY DIFFERENCES
1. Design Aesthetics: The bad website is plain, while the good website is modern and engaging.
2. User Experience: The bad website only shows information; the good website provides immersion.
3. Content Presentation: Text lists vs posters and cards.
4. Target Audience: Basic viewers vs movie enthusiasts.
